## Oberg Medical Adds Surface Finishing Capabilities Through Broad Peak Acquisition

FREEPORT, PA – Oberg Medical, a full-service medical device contract manufacturer, is pleased to announce today that it has completed an acquisition of Broad Peak Manufacturing, LLC. A privately-owned manufacturer located in Wallingford, Connecticut, Broad Peak specializes in innovative, high-precision surface preparation and finishing solutions for implants used in joint replacement procedures. Terms and details of the transaction are not being publicly disclosed.

“The addition of Broad Peak’s unique surface enhancement capabilities will expand Oberg’s comprehensive manufacturing and secondary services currently available to our medical OEM customers,” said Cliff Forrest, owner of Oberg Industries, parent company of Oberg Medical. “As we continue to grow, our investments in new and unique technologies are critical for delivering better efficiency, quality and additional value to our customers,” Forrest added.

Oberg Medical, with facilities in Sarver, Pa., Chicago, Ill., and San Jose, Costa Rica, manufactures metal and plastic implants, instruments and assemblies, and automation solutions with a focus on the Orthopedic, Spine, Extremity, Endoscopic/ Laparoscopic, and Cardiac Rhythm Management markets.

Oberg plans to continue operations as usual at the Wallingford facility during its transition to an Oberg Medical division and will retain Philip Milidantri, Vice President, as active manager.

In 2018, Oberg Medical acquired Illinois-based X-L Engineering to add more specialized manufacturing capacity for its customers, recently expanding into a new 70,000 sq. ft. location near Chicago’s O’Hare Airport.
