

Our Commitment to Reducing Carbon Emissions

Oberg Industries is committed to decarbonization to mitigate the impacts on the environment. Our goal is to achieve a 50% reduction in carbon emissions (CO2e) intensity (per unit of sales) from our Metal Stamping Center, located in Sarver, Pennsylvania, by 2025.

	Base Year – 2019	Most recent Year - 2024
Scope 1 emission in Tons	416	326.4
Scope 2 emission in Tons	1281	0

We are PROUD to report that our CO2e intensity (per unit of sales) was reduced by **-85%** from 2019 vs 2024.
