

Oberg Industries
PASSION FOR PRECISION MANUFACTURING

AUTOMATION

**ADVANCED AUTOMATION SOLUTIONS FOR
COMPLEX ASSEMBLY CHALLENGES**

Oberg Industries can provide our OEM customers with customized tooling, stamping, and **automation** solutions needed to solve their production and assembly challenges. Our **automation** capabilities range from stamping specialized pacemaker components to creating staple loading systems. We even work with OEMs to design and develop specialized **automation** work cells for manufacturing and assembling components used in cardiac and robotic surgeries.

FOUNDED

1948 By Don Oberg

SKILLED EMPLOYEES

MANUFACTURING SPACE

450,000+ SQUARE
FEET

HEADQUARTERS

Freeport, Pennsylvania

MANUFACTURING FACILITIES

**Pennsylvania
Illinois
Connecticut**

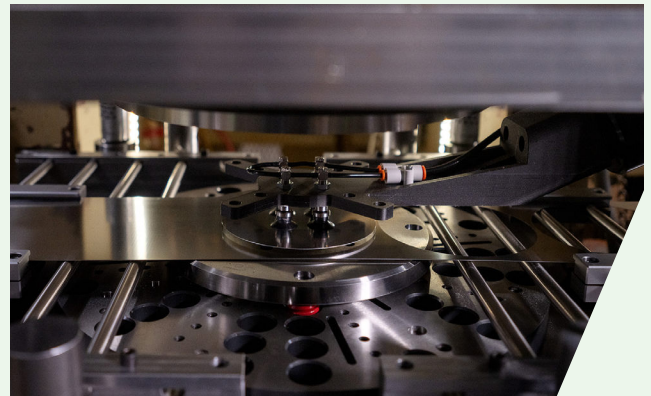

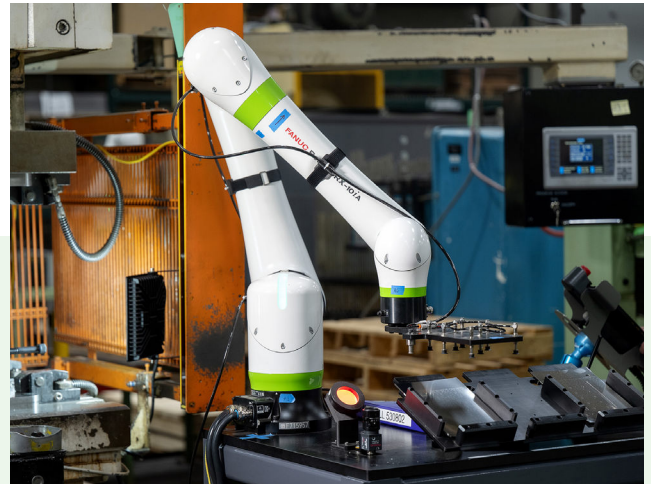

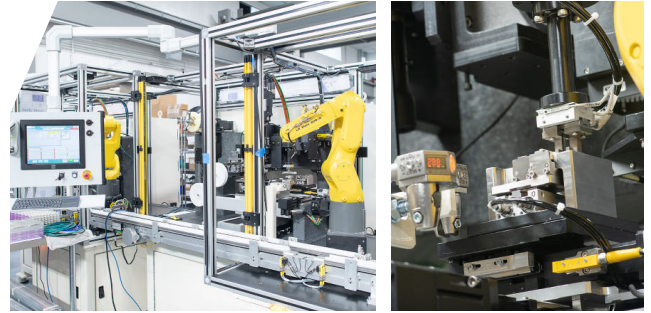

INTERNATIONAL SALES OFFICE

Germany

APPLICATIONS

- Medical Device assembly automation
- Medical staple manufacture and cartridge load automation
- Automation Systems for Pacemakers; batteries, leads
- Diabetic Test Strip die-cut automation
- Coin Bagging Machines
- Battery Assembly Systems
- Automated Servo Press Systems
- High Precision Tool and Die
- Stamping Press Robotic Tending
- Operator Maned Servo-Press Modules
- Consumer shaving components automation
- Automation systems for jet engine parts
- Automated Die-Cut Systems for plastics and composites

CAPABILITIES

Assembly Systems

Automated Tooling Systems

Robot Integration

- Industrial robots
- Collaborative robots
- Vision guided robotics

Vision Systems

- Inspection modules
- Vision corrected positioning of parts with multi-axis servo systems
- Positioning for robots

Indexing Systems

Pneumatics

Servo Motion Systems

- Electronic cam multi-axis systems
- Coordinated motion control
- High speed X-Y-Z positioning
- 1-30 ton custom servo press systems

Stamping Press Automation

- Transfer systems
- Feed systems
- In-die assembly

Build-To-Print

High Precision Tooling

Oberg Industries

PASSION FOR PRECISION MANUFACTURING

Oberg Industries is a global contract manufacturer producing precision machined and stamped metal components, tooling and assemblies for some of the world's most recognized companies. Through ingenuity and collaboration, we develop unique solutions to give you a competitive advantage with improved precision, efficiency and output.
